## Start of Block: Overview

Q1906 What is your Prolific ID?

---

## End of Block: Overview

---

## Start of Block: Introduction

Consent **Nature of the study.** You are invited to participate in a study in which you will determine if a list of statements belong to an adult or an artificial intelligence (ChatGPT). After the study, we will ask you to provide some basic demographic information. The session should last around 30 minutes.

**Compensation.** You will be paid £4 for your participation. This study contains attention checks to make sure that participants are finishing the tasks honestly and completely. As long as you read the instructions and complete the tasks, your data will be approved. If you fail these checks, your data will be rejected.

**Risks and benefits.** There are no known risks to participation in this study. Other than the payment mentioned, there are also no tangible benefits to you, other than contributing to our knowledge about human reasoning.

**Confidentiality and use of data.** All the information we collect during the course of this research will be processed in accordance with Data Protection Law. In order to safeguard your privacy, we will never share personal information (e.g., your platform ID) with anyone outside the research team. Your data will be referred to by a unique participant number rather than by your platform ID. However, please note that we will temporarily collect your platform ID to prevent repeated participation. The anonymized data collected during this study will be used for research purposes.

**What are my data protection rights?** The University of Edinburgh is a Data Controller for the information you provide. You have the right to access information stored about you. Your right of access can be exercised in accordance with Data Protection Law. You also have other rights including rights of correction, erasure and objection. For more details, including the right to lodge a complaint with the Information Commissioner's Office, please visit [www.ico.org.uk](http://www.ico.org.uk). Questions, comments, and requests about your personal data can also be sent to the University Data Protection Officer at [dpo@ed.ac.uk](mailto:dpo@ed.ac.uk).

**Voluntary participation and right to withdraw.** Your participation is voluntary, and you may withdraw from the study at any time and for any reason. If you withdraw from the study during or after data gathering, we will delete your data.

If you have any questions about what you've just read, please feel free to contact us by email at [bramleylab@ed.ac.uk](mailto:bramleylab@ed.ac.uk). This project has been approved by PPLS Ethics committee. If you have questions or comments regarding your own rights as a participant, they can be contacted at 0131 650 4020 or [ppls.ethics@ed.ac.uk](mailto:ppls.ethics@ed.ac.uk).

By accepting this study, you consent to the following:

1. **I agree to participate in this study.** 2. I confirm that I am at least **18 years** old or older. 3. I confirm that I have read and understood **how my data will be stored and used.** 4. I understand that I have the right to **terminate this session** at any point.

☐ I agree, begin the study. (1)

☐ I do not agree, I do not wish to participate. (2)

Start of Block: Part 1 (Turing) Introduction

P1 In the next pages, you will see a list of questions about different topics. We previously asked these questions to an artificial intelligence (ChatGPT) and to human adults, and collected their responses. The AI was instructed to adopt a human persona and to answer as that person.

For each question, you will see one answer given by an AI and one answer given by a human adult.

Your task is to **select the answer that you think was given by the human adult.**

On some questions the answers may seem very similar and hard to tell apart. Don't worry about this and don't overthink it; just make your best guess.

Whenever a human or AI answered in a full sentence (ie. included the wording of the question in their answer), their response was shortened to remove the question. All their responses follow the same standard form. We tried to standardise punctuation and spelling. Any typos, or missed capital letters at the start or full stops at the end are the fault of the researcher and should not influence your answer. In other words, base your answer only on the content of the responses.

At the end of the survey, you will be asked to briefly explain how you made your judgments.

Click the next button to proceed.
