S4 - Turing Answer Rating - Survey Answer Collection

Consent **Nature of the study.** You are invited to participate in a study in which you will determine if a list of statements belong to an adult or a voice assistant (such as Siri and Alexa). You will further answer a list of questions about different topics. After the study, we will ask you to provide some basic demographic information. The session should last around 30 minutes.

   Compensation. You will be paid $3 for your participation. This study contains attention checks to make sure that participants are finishing the tasks honestly and completely. As long as you read the instructions and complete the tasks, your HIT will be approved. If you fail these checks, your HIT will be rejected.

   Risks and benefits. There are no known risks to participation in this study. Other than the payment mentioned, there are also no tangible benefits to you, other than contributing to our knowledge about human reasoning.

   Confidentiality and use of data. All the information we collect during the course of this research will be processed in accordance with Data Protection Law. In order to safeguard your privacy, we will never share personal information (e.g., your working ID) with anyone outside the research team. Your data will be referred to by a unique participant number rather than by your working ID. However, please note that we will temporarily collect your worker ID to prevent repeated participation. The anonymized data collected during this study will be used for research purposes.

   What are my data protection rights? The University of Edinburgh is a Data Controller for the information you provide. You have the right to access information stored about you. Your right of access can be exercised in accordance with Data Protection Law. You also have other rights including rights of correction, erasure and objection. For more details, including the right to lodge a complaint with the Information Commissioner's Office, please visit www.ico.org.uk. Questions, comments, and requests about your personal data can also be sent to the University Data Protection Officer at dpo@ed.ac.uk.

   Voluntary participation and right to withdraw. Your participation is voluntary, and you may withdraw from the study at any time and for any reason. If you withdraw from the study during or after data gathering, we will delete your data.

   If you have any questions about what you've just read, please feel free to contact us by email at bramleylab@ed.ac.uk. This project has been approved by PPLS Ethics committee. If you have questions or comments regarding your own rights as a participant, they can be contacted at 0131 650 4020 or ppls.ethics@ed.ac.uk.

   By accepting this HIT, you consent to the following:

   1. **I agree to participate in this study.** 2. I confirm that I am at least **18 years** old or older.   3. I confirm that I have read and understood **how my data will be stored and used**. 4.

I understand that I have the right to **terminate this session** at any point.

○ I agree, begin the study. (1)

○ I do not agree, I do not wish to participate. (2)

Overview Thank you for your participation. This survey consists of 3 parts:

In Part 1, you will determine if a list of statements belong to an adult or a voice assistant.

In Part 2, you will answer three questions about different topics.

In Part 3, you will answer three questions about yourself.

Please click the next button to proceed.

P1 Part 1

In the next pages, you will see a list of questions about different topics. We previously asked these questions to voice assistants (such as Alexa, Siri, and Google Assistant) and to adults, and collected their responses.

For each question, you will see one answer given by a voice assistant and one answer given by an adult.

Your task is to **select the answer that you think belongs to an adult**.

Please read the questions and answers carefully. At the end of the survey, you will be asked to briefly explain how you made your judgments.

Click the next button to proceed.

Reminder Select the answer that belongs to <u>an adult</u>.

Rationale Please briefly explain how you decided if an answer belongs to a human adult.

Which criteria did you use? What did you pay attention to? Which factors influenced your decisions?

_____

_____

_____

_____

TuringOpen Imagine you are sitting in front of a curtain. Behind the curtain, there is either a voice assistant or an adult. You are trying to find out which it is. You can ask the agent one question, and the agent will provide a written answer. You will try to guess their identity by reading their answer.

From among those you read in previous pages, which question do you think was the best to find out the identity of the agent behind the curtain?

_____

_____

_____

_____

_____

P2
Part 2

On the next page, you will see three questions about different topics. Your task is to answer them.

For each question, please type the answer that comes to your mind naturally (as if we are asking you these questions in person).

Do not use any sources such as Google or a calculator.

We are not interested in "correct" answers but how you respond off the top of your head.

 Do not hesitate to write that you don't know the answer or that you aren't sure.

 Your answers can be as short or long as you want.

Click the next button to proceed.

Reminder **Please answer the questions below. When you are done, click the next button to proceed.**
